

LIBRE DE  
BISFENOL A  
Y FTALATOS  
DESDE 2003

**Ref. 80140**

**Taza Medicup**

- Ideal para que el niño empiece a dejar el biberón y se vaya adaptando a la taza.
- Sus asas ergonómicas permiten una perfecta sujeción.
- Está provista de una válvula especial anti-goteo, que reduce el riesgo de infección de oído y proporciona un mayor confort de toma al bebé.
- La boquilla es resistente y de tacto agradable, perfecta para la etapa del destete.
- Está fabricado con material libre de la hormona artificial Bisfenol A.
- Colores surtidos.
- Conforme normativa Europea UNE-EN 14350-1:2005.

\*Las asas se pueden adaptar al biberón Bebé Due Medic, y al igual que la tetina, se venden por separado.

**Medicup drinking cup**

- Ideal for babies who are being weaned off the bottle and are starting to adapt to a cup.
- Its ergonomic handles allow for a perfect grip.
- It has a special anti-spill valve, which reduces the risk of ear infection and offers greater comfort for baby's feed.
- The spout is hard-wearing but gentle to touch, perfect for the weaning stage.
- It is manufactured free from the artificial hormone Bisphenol A.
- Assorted colours.
- Conforms to European standard UNE-EN 14350-1:2005.

\* The handles can be used on the Bebé Due Medic feeding bottle, and like the teat, they are sold separately.

**Ref. 80141**

**Ref. 80142**

**Boquillas Medicup**

- Boquillas aptas para la taza Medicup.

**Medicup spouts**

- Spouts suitable for the Medicup drinking cup.

**Asas Medicup**
